# SEQUINS AND BEADING FUNCTIONS
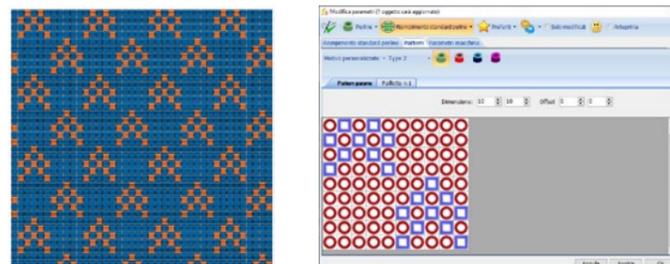

Create design for embroidery machines with single and multi-sequins device, single and twin beading devices.

**Get professional results in short time!**

▶ Automatically recognize colors and convert images into sequins/beading objects.

▶ "Color match" function to convert images into sequins designs.

▶ Custom sequins/beads patterns (set different size, colors and shapes).

▶ Flip sequins with automatic conversion of different front and rear designs.

▶ Pre-set and custom sequins styles for tack down stitches.
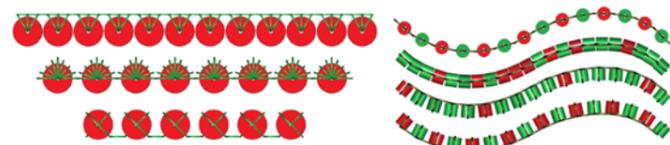

▶ Display sequins/beads while digitizing outlines and in the worksheet.

▶ Automatic adjustment of drop stitches (always from north to south, no matter the sequins direction).

▶ Brush tool, to easily change sequins/beads color/shape/size.

▶ Eraser tool, to easily erase stitches or sequins/beads drops.

GMI srl has been producing professional embroidery and laser design software since 1980; the GMI Academy and its agents have trained thousand of operators.
It has been producing laser cutting systems for over 20 years.
It counts thousand of laser systems installed worldwide.

## NEW USER INTERFACE, MORE INTUITIVE AND EFFICIENT

We have reduced the number of visible buttons in the design interface to get a **larger workspace**.

Simple graphic digitizing approach, with the most populargraphic tools (i.e. spline, guidelines, work with objects, etc.).
The user interface is so simple that those who never worked with design programs can be immediately operative.

Personalize the tools bar by adding the most used buttons.

Save **personalized set of parameters** (styles), for faster digitizing.
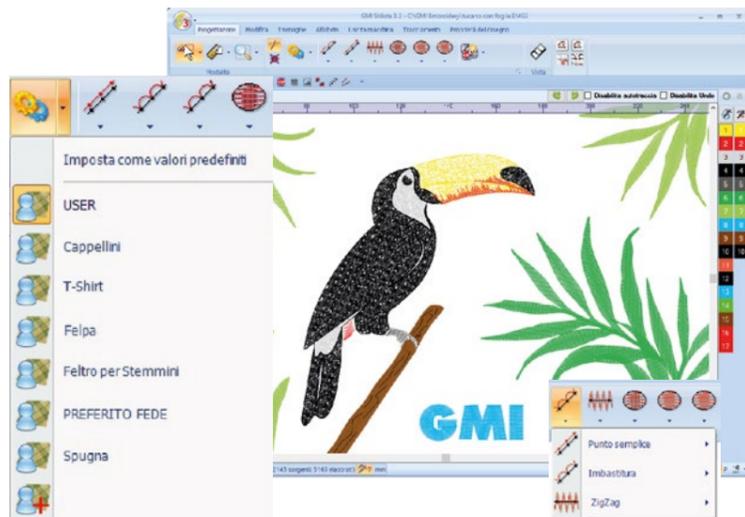

THE ENTRY LEVEL «EASY RICAMO» INCLUDES PROFESSIONAL TOOLS TO CREATE HIGH QUALITY STITCH DESIGNS EFFORTLESSLY

▶ NEW and simplified mode to set color change, lock stitch and thread cut, that are now properties of the object.

▶ NEW graphic workspace specifically dedicated to vector images: the vector design can be edited independently from the embroidery design.

FASTER DIGITIZING FOR PROFESSIONAL AND NEWCOMERS

▶ NEW image manipulation tool that reduces/simplify the colors of bitmap images, to use the **autotrace** digitizing tool.

▶ Quickly convert vectors to any available stitch type.
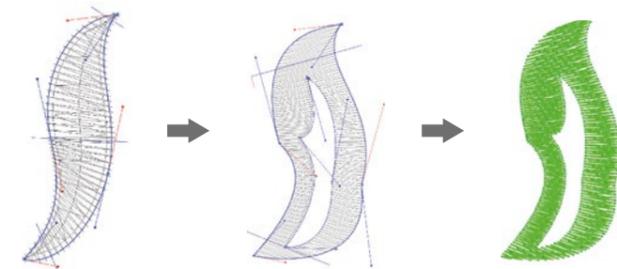

▶ Automatically convert any Windows True Type Fonts to stitches.

▶ Branched running stitch with automatic return to start point (for accurate double stitch outlines).
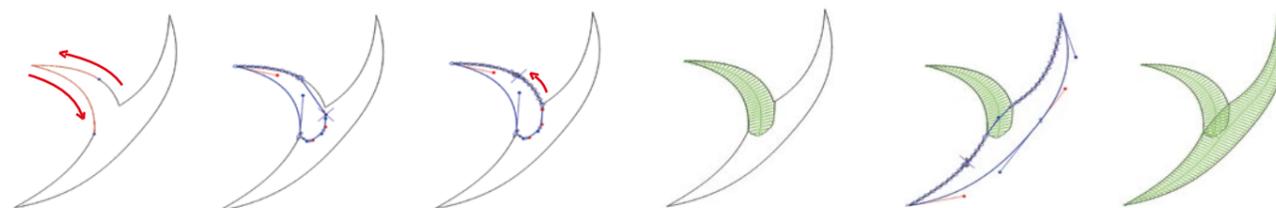

▶ Top precise borders' tracing.

▶ Optimized stitch position.

THE «SMART TOP» LEVEL INTEGRATES MORE TOOLS

▶ Import and **autotrace** vector designs; control the digitizing with the possibily to unlock the auto-tracing and continue to draw manually with the graphic drawing tools.

▶ **Autopunch** of vector images with full control of digitizing: the operator can select which parts of the designed will be autopunched and he can split the outlines, draw angle lines, complex fill with holes, organize the sequence, automatic entry and exit stitches.

▶ 380 Underlay stitches and possibility to create new ones.

▶ 380 Linear Special Stitches and possibility to create new ones.
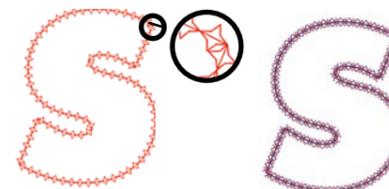

▶ Satin fill Split.
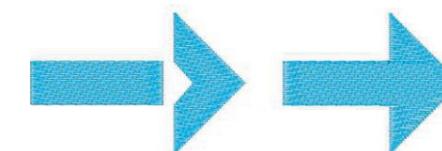

▶ Automatic Appliqué with appliqué background.

▶ NEW shaping tool: weld, trim, brake apart.

▶ Auto duplicate and offset layouts.

▶ NEW branched column stitch.

▶ Edit objects in the film sequence tool.

---

5 GOOD REASONS TO USE STILISTA 3.3

1 ▶ **ENHANCE PRODUCTIVITY** with many automatic tools, personalized parameters and intuitive interface

2 ▶ **GET HIGHEST QUALITY** with advanced stitch calculation and professional parameters wizard

3 ▶ **MORE FLEXIBILITY** any time you can transform/edit the stitch type and the type of processing (embroidery/laser/rhinestones)

4 ▶ **PROFESSIONAL EDUCATION** with individual and custom made classes made by our personnel, you will soon start designing!

5 ▶ **SUPPORT SERVICE** our experts will answer your questions and support you remotely and at the phone

ADD MORE VALUE TO YOUR DESIGNS WITH THE MULTI-DECORATION TOOLS

Any time you can add the functions to draw rhinestone and laser designs.
Or you can get the software to draw solely rhinestones designs, compatible with the most popular automatic rhinestone setting machines, plotter laser, cutters or for manual processing.
